JavaScript: Yes / No

Custom JavaScript/jQuery

Where did you use JavaScript?	Briefly describe the purpose
Overlay Menu	We use overlay menu to describe some content it is specified for users and it is also use for mobile screen, when screen is below 720px then 1 extra overlay menu will be displayed.
Header Scrolling Effects	When scroll the top header will hide and when scroll down it will displayed. The main header will change it states continuously.
Back to top Button	When scroll to 25px then the one button will be displayed and it is use to scroll top to 0.
accordion	Accordion.
Form Management	To display the some forms on one page.

Use of AJAX in the application

Where did you use AJAX?	Briefly describe the purpose
Signup page (register page)	When user is registering it checks the email from the database and tells it if it already is taken by someone or not
